Vedic Astrology Reading

Wilton Gayo Astrologia

With over thirty-five years of astrology experience and 10,000 astrological charts read over that time, Wilton Gayo has created a unique Astrological Chart reading that unites his knowledge of Vedic and Western Astrology and Comparative Mythology to offer a unique insight into your life and future.

Once created, your Astrological Chart will be read during a video conference online and simultaneously recorded, with plenty of time for questions and answers. During the reading, Wilton will give you a detailed explanation of your chart, with guidance on how to overcome obstacles and challenges, and how to use your best potential to create a fulfilling future.

What is a Vedic Astrological Chart and what is a reading by Wilton like?

An Astrological Chart, also known as a Natal Chart or Astrological Chart, is a "picture" of the sky that records where all the planets and celestial bodies were located at the time you were born.

Reading an astrological chart can reveal your potentials and your life challenges, your opportunities for soul growth and the best times to move more efficiently in the face of important decisions. Vedic Astrology is based on very specific knowledge of lunar and planetary movements. Wilton creates a unique astrological reading using his knowledge of Vedic, Western and Mythology Astrology.

Why make a Vedic Astrological Chart and what benefits does it bring?

Fundamentally, the Vedic Astrological Chart offers insight into who you are and the different aspects of your nature. It also indicates the different possibilities in the spheres of the material, emotional and spiritual world of each person, helping them to understand their potential and life purpose.

During your reading, Wilton will explain your chart in detail, offering a broadening view of who you are. He will also explain your unique potential and interests and how they can be achieved in your life. Ultimately, the astrological chart will help you take the right steps towards happiness, which are then steps towards the realization of your life purpose!

Can you give me more information about the benefits of making an Astrological Chart?

The map offers a strategy of self-knowledge, using symbols that express possibilities in the material world, in the emotional world and in the spiritual world of each one. The material aspects of life in astrological houses. The emotional aspects in the planets, lunar nodes, sun and moon. The spiritual aspects or the great collective potentialities in the signs and nakshatras.

When, in astrology, we think about the individual's life purpose, we are dealing with a totally personalized chart, we are facing a soul that embodies universal potentialities, conditioned by its past lives and those of its ancestors and by the current physical environment. Social, financial and political position, level of education and family environment must be decoded and amplified by universal organizing principles. We call these principles Dharma. Each chart is a particular expression of this Universal Dharma, which is related to the pursuit of happiness, but which is also linked to individual karma. Each individual, according to all these external and internal conditions, will have a way of acting. Action is karma. Good karma can show up as a good vocation, bad karma can show up as repetitive tendencies, negative and unconscious, the vasanas. The remedy for bad karma is right action, the manifestation of individual abilities in tune with the universal order. When someone is constantly faced with challenging situations, we can perceive the existence of negative karma, which needs to be understood and resolved.

The mind is the “owner” of memory, but also the source of creative and transformative power. The moment you understand the causes of your unhappiness, these causes need to be abandoned, they cannot continue to be focused and energized… then the astrologer comes in to show the possibility of creative power as the antidote to be used. We usually find all this in astrological positions and their mythologies.

Love relationships: how can Wilton's astrological reading help me?

The astrologer's role is to use the Astrological Chart for understanding the potentials and challenges in an individual's life. Each graph shows a totally unique configuration. The Astrological Chart can reveal an inherited belief or some conditioned behaviour that has been learned and reinforced in this life, becoming a habit. Or the possible existence of a karmic situation that needs to be understood and resolved. As he reads, Wilton will identify the challenges related to love, as well as solutions to those challenges, on his chart. It will also identify the positive aspects of your chart that can help in meeting, harmonizing or strengthening your relationships.

What is the difference between Vedic Astrology and Western Astrology?

1. Vedic astrology uses a different calendar. Western astrology bases it’s charts on the "tropical calendar" - (which a lot of the world uses) and also the four seasons, whereas Vedic astrology charts are calculated using something called the sidereal system, which looks at the changing, observable constellations. (Western astrology does not change in the same way and works with the planets' fixed positions.)

2. Vedic astrology also includes your karma and dharma. Another difference is that modern Western astrology has become more psychologically oriented, whereas Vedic astrology is based upon one's individual karma. Vedic astrology gives insights into your life path, or personal dharma, and reveals our innate gifts and challenges.

Both astrological systems have their own value and merits and are equally as powerful as each other. Neither one is better or more correct than the other. A lot of

people now reference both to strengthen their insights further. Vedic astrology, just like Western Astrology has many nuances and is considered an advanced astrological system, and as such, a reading combining both systems can be extremely powerful.

Can you tell me a little bit more about Vedic Astrology?

The Vedic word is derived from Vedas which means sacred knowledge - it is a large body of religious texts originating in ancient India. Vedic is also known as Jyotish - is based in these religious texts, called the Vedas. The main scriptures are thought to have been written by Bhrigu, a sage known as the father of Vedic astrology, during the Vedic era.

Vedic astrology explains planetary motions and position with respect to time, space, and their effect on humans and all the other entities on the planet Earth. As well as that, Vedic astrology has a branch called Muhurat astrology that you can use to determine the most auspicious dates to do something - like a big life events such as a wedding, to get the most beneficial results.
